Does this result have a noncommutative analogue?

摘录 / EXCERPT: Does this result have a noncommutative analogue? More precisely, does a similar result hold if we replace R by $k\langle x_1,\dots, x_d \rangle /(r_1, \dots, r_s)$?

Generalising a result of Schmidt-van den Dries (problem 2)

摘录 / EXCERPT: Does a version of the above result hold for finitely presented modules M over a finitely presented k-algebra A? That is, is torsion in M detected in bounded degree?

Sklyanin algebras and cocycle twists (problem 2)

摘录 / EXCERPT: Suppose A is an AS regular algebra which is Koszul, Auslander regular, Cohen-Macaulay etc. and that there exists a homogeneous central element Ω. If...

Sklyanin algebras and cocycle twists (problem 3)

摘录 / EXCERPT: If R_Ω is not a domain, is $Q_{\text{gr}}(R_\Omega)_0$ isomorphic to $M_2(D_{\text{Skl}})$, where D_{Skl} is the Sklyanin division algebra.
